Health information

Herd last tested clear from TB in 2015, Currently on a 4 year TB testing interval
Member of SAC Premium Cattle Health Scheme
Accredited free from BVD since 2010, Herd testing for BVD
Routinely vaccinating against BVD (Females Only)
Herd testing for Johnes, Johnes Status Risk Level - 1, since 2016
Declaration notes: Male & Female BVD Vaccination dates May 2018

Foreword

The Mendick herd was founded in 1987 with two cows and a heifer bought at the sale of Bruce Stewart's Ford herd when he emigrated to Canada. At this time we had a large commercial beef herd which we had decided to manage as a closed herd.

The Simmental bull Solway Nominee being used in the herd at the time had proved the breed's value by being a prolific and trouble-free breeder for ten years and still of substantial value at twelve years old.

The pedigree herd has always been run as part of the commercial herd which numbered 240 cows at one time, with only weaned bull calves showing extra potential receiving different management.

Replacement homebred heifers have been bulled to calve at two years old ever since the formation of the closed herd. An easy calving bull has been used to make this as trouble-free as possible. The two year old heifers in the sale are nursing Hereford cross calves which have proved to be easy calving with good live weight gains after a stress-free birth.

A rigorous culling policy has always been in place borne out by the records of all cows in the sale showing that they have always been regular trouble free breeders all their lives.

Every animal, other than the maiden heifers, has been running with Blackford Grouse from 26 June until sale time and will be scanned prior to sale with as much information available as possible.

In 2006 some of the very best commercial cows which were at that time at least three quarter Simmental were entered into the appendices and the best of their progeny have been graded up. All animals in the catalogue are fully pedigreed and all calves are fully registered with the exception of the Hereford cross calves with the heifers.

Only the best stock bulls have been used over the years and have always had to prove themselves in the commercial herd before being used extensively on the pedigrees. The current stock bull Blackford Grouse is in the sale and is a full brother to Capercaillie, the record priced Simmental bull at 45000gns and a sire of many champions and top priced animals.

Our thirty-plus years of breeding Simmental cattle has made us many friends and given us many experiences at home and abroad for which we will always be very grateful and would not otherwise have had.

We hope that purchasers will experience the same enjoyment, success and satisfaction that we have had.

John, Kate & Hamish Dykes

This being a dispersal, no warranty is implied or given

Cows with calf at foot

All have been running with Blackford Grouse from 26 June until sale

gs. KILBRIDE FARM STRABANE (M065449)

Dam - BLACKFORD WAGTAIL (F089615)

gd. BLACKFORD SAFFRON (F078792)

Grouse was purchased in Oct. 2016 for 11,000gns. He is a full brother to record priced bull Capercaillie 45,000gns and Finch 12,000gns.

He has proved to be a very fertile and sound sire with a superb temperament and easily calved offspring who speak for themselves.
